

# STRUCTURAL WOOD SYSTEMS

Division of Harrison Industries, Inc.

## THE PINE PRESS

4<sup>TH</sup> QUARTER 2012

VOL 1 ISSUE 4

Structural Wood Systems continues to push the limits of laminated construction. This quarter's featured project is a prime example of the magnitude of laminated timber which S.W.S. is able to manufacture and ship.

*Handling and turning of members this size takes skill and coordination.*

*Shop pre-fitting of hardware ensures proper fit and time saving of erection at the jobsite.*

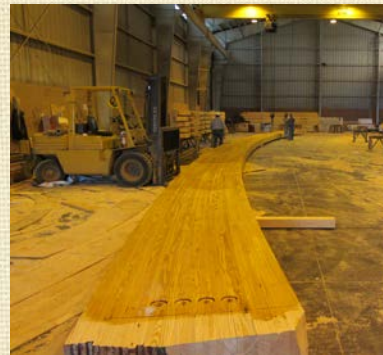

*Years of experience contribute to an outstanding product.*

## FEATURED PROJECT

### Fertilizer Bulk Storage Facility

Structural Wood Systems has begun producing its largest order to date. The project is a 200 x 1100 fertilizer storage facility for bulk storage at a Florida port.

The project consists of 126' long laminated radial curved arch halves pinned together at the center line. Due to an offset conveyor system causing an unbalanced load, some of the arch pairs have unsymmetrical sizes with specially designed peak connections.

Needless to say, this is yet another example of Structural Wood Systems' expertise in the manufacturing and shipping of specialty glu-lam products.

Structural Wood Systems would like to wish each and every one of you a very Merry Christmas, and a Happy and Prosperous New Year!
