

# STRUCTURAL WOOD SYSTEMS

DIVISION OF HARRISON INDUSTRIES, INC.

## THE PINE PRESS

1ST QUARTER 2019

VOL 8 ISSUE 1

As we close the first quarter of 2019, Structural Wood Systems is staying busy producing custom glulam for new projects across the US. We look forward to seeing what other new and interesting projects come to life in our plant this year.

Pictured above is a progress photo of the glulam installation. The long curved beams were carefully lifted into place by experienced erectors.

The natural light shining through the roof system gives a feeling of being outdoors even in the winter months.

Wood columns help support the curved beams leading to the enclosed roof area where our stained decking provides some shade throughout the indoor water-park.

### Project Spotlight Gaylord Opryland Resort Indoor Water-Park

Structural Wood Systems is proud of our work on the new Gaylord Opryland Resort and Convention Center. The new resort boasts beautiful indoor gardens, restaurants, and other amenities. Situated perfectly in the heart of Nashville, the resort is over 750,000 square feet.

Sound Waves is the resort's indoor/outdoor water-park. SWS Sales Representative, Frank Sledge, worked closely with D.F. Chase Construction, Inc. to ensure the project ran smoothly.

Structural Wood Systems provided custom glue-laminated wood beams and decking for the 111,000 square foot indoor portion of the water-park. The curved laminated beams compliment the transparent foil roof. Pictured above is a section of the unique roof system. The indoor portion of Sound Waves is open year round.
