

STRUCTURAL WOOD SYSTEMS

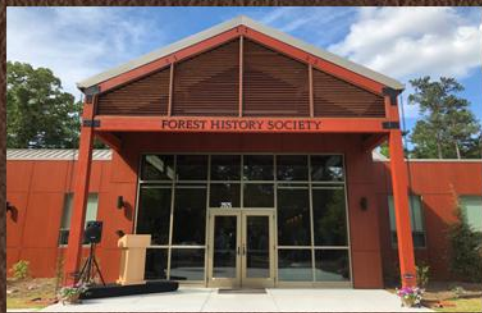

DIVISION OF HARRISON INDUSTRIES, INC.

THE PINE PRESS

2ND QUARTER 2019

VOL 8 ISSUE 2

2019 is shaping up to be a great year here at SWS! If you have photos of your glulam projects, we invite you to send them to us. We love seeing photos of completed projects using SWS glulam.

The Forest History Society is the steward of forest history treasures. They preserve forestry so we may continue to study, learn, and move forward with greater knowledge.

President and CEO, Steven Anderson, cut the ribbon alongside the wonderful staff at the Forest History Society.

The natural stain color selected for the glulam and decking brings warmth to the library area, enhanced by the abundance of natural light.

Project Spotlight Forest History Society

Structural Wood Systems recently attended the Forest History Society's Grand Opening in Durham, NC. Structural Wood Systems is proud to have been one of the team members who made this project possible. During the bidding stage of the project, Forest History Society members, including President Steven Anderson, came to visit Structural Wood Systems. They met with SWS President, Wayne Lee, to discuss the needed materials and services for the project.

Sales Representative, Chris Eason, worked closely with C.T. Wilson Construction Co. Inc., during the bidding and construction of this amazing project.

The Forest History Society is a one of a kind library and archive dedicated to all things wood. Thank you to President and CEO Steven Anderson and all the members of the Forest History Society, for allowing us to join you for this special occasion.
