

# STRUCTURAL WOOD SYSTEMS

DIVISION OF HARRISON INDUSTRIES, INC.

## THE PINE PRESS

1ST QUARTER 2017

VOL 6 ISSUE 1

As the first quarter of 2017 ends, Structural Wood Systems is gearing up for another busy and productive year. We look forward to helping all of our customers with their new and upcoming projects. From design to build, we are here to help you with all your laminated wood needs. Thank you all for allowing Structural Wood Systems to be a part of your amazing projects!

To ensure the beams would fit together perfectly, SWS fabricators pre-fit the beams before they left our facility in Greenville, AL (pictured above).

The erection crews worked carefully installing the assembled beams. The above photo gives you an idea of just how large the beams are.

We would like to welcome our newest engineer, Aaron Hayes, to the SWS family.

### FEATURED PROJECT

Texas ISD Natatorium

This past year, Structural Wood Systems worked on several impressive projects. One of the more impressive natatorium projects was in Cypress, TX.

In conjunction with R.M. Rodgers Inc., SWS provided the massive glue-laminated beams and purlin system for a new 33,000 sq ft Natatorium. The beams were 94 inches deep and spanned the complete 142 feet length of the Natatorium.

The beams were spliced for shipping purposes. However, the excellent craftsmanship of SWS fabricators made the splice nearly invisible once the pieces were assembled in the field. The above photo shows the beautiful craftsmanship of the nearly completed interior for the project.
