

COMPANY SPOTLIGHT: COAST AL

Structural Wood Systems, with Sales Representative Frank Sledge, recently supplied the glue laminated materials and decking for the new Coast AL project in Orange Beach, AL. The completed project will consist of 3 main buildings organized around a central green space (rendering pictured right).

The 5,000 square foot outdoor bar (pictured top left) and 6,000 square foot retail center (pictured top right) are now open. The 20,000-square-foot restaurant (pictured right) is currently under construction. The restaurant is designed in classic coastal Alabama vernacular architecture, while the retail building draws inspiration from historic southern market structures.

The interiors of all three spaces have been designed to showcase the glulam construction. The exposed wood structure creates a warm, casual atmosphere we can't wait to visit!
