

STRUCTURAL WOOD SYSTEMS

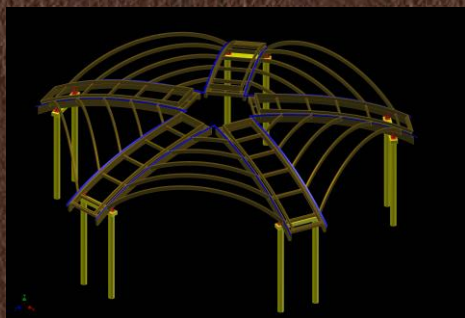

DIVISION OF HARRISON INDUSTRIES, INC.

THE PINE PRESS

2ND QUARTER 2013

VOL 2 ISSUE 2

As the saying goes "When the going gets tough, the tough get going." This has proven to be true with The Structural Wood Systems' Sales Team. Thank you for your continued effort in successfully furnishing the most exquisite laminated timber for some very prestigious buildings.

100' Diameter Dome conceptual drawing.

Multiple compound miter cuts and half width notching

Intricate dapping done by hand.

FEATURED PROJECT

University of North Carolina Dining Hall

Structural Wood Systems has completed manufacturing an extremely complex and beautiful project. This one is a dining hall for The University of North Carolina at Greensboro. The detailed fabrication of notching, kerfing, and dapping conceals much of the connecting hardware and actually joins much of the timber together with only the use of lag screws without steel plates.

SWS Representative Mike Eason worked closely with the sub-contractor, Steel Fab, in providing not only the material, but also the labor for the erection of the laminated wood system.
