

COMPANY SPOTLIGHT: **Forest Products & Sustainability Tour**

Auburn University Students visited Structural Wood Systems this quarter as part of their Forest Products and Sustainability Tour.

Sophomore students from Auburn University's College of Architecture, Design & Construction, visit several facilities during this tour. Each stop on their tour highlights different aspects of the timber industry.

During the plant tour, students can watch the process of glulam manufacturing and watch our fabricators turn these beams into Architectural showpieces. Students are also given a tour of our steel shop, where they can watch custom connections being made in real time.

Structural Wood Systems has been a proud part of this tour for over 45 years. Each year we look forward to sharing what we do with a new generation of Architects and Designers.
