

COMPANY SPOTLIGHT:

OSU Equine Arena

Structural Wood Systems recently provided laminated materials and decking for a new equine arena at Ohio State University. The over 12,000 square foot facility will house the Equine Sports Medicine Program at OSU. SWS Sales Representative, Kyle Heminger, worked closely with the design team to bring this project to life.

Rory Wray with Glue-Lam Erectors, Inc., led the team for the glulam and decking installation. Over 126,000 board feet of lumber was used in making the glulam and decking for this project. The arches span 82' and are 30' tall at the highest point.

Pictured right, you can see the glued arches stacked while waiting for fabrication. It is amazing to see the transformation from freshly glued arches to the finished project.

SWS is proud of the hard work Kyle, Rory, and their team put into this project. Thanks to their dedication and team work, this project turned out great!
