

COMPANY SPOTLIGHT: Personal Residence – “Map House”

Welcome to Paradise! If you've been following our updates on Facebook, you've likely caught a glimpse of this remarkable project. The heart of this exquisite home, including its stunning curved roof sections, has been crafted using southern pine glulam. However, what truly sets this masterpiece apart is the magnificent "world window," a term we affectionately use around the office. (Pictured Above)

In the image to the right, you can see that the entire window was meticulously assembled throughout the fabrication process, ensuring a flawless fit during installation.

Fashioned from sustainably sourced Southern Pine, this glulam wood can not only withstand the harshest elements but also showcases the inherent, natural beauty of wood throughout the entire home.

The "world window" will soon feature custom curved glass, providing an unparalleled view of the crystal-clear waters of the Florida Keys. Remarkably, the window sits almost directly on the beach. Due to its proximity to the water, a crane was brought in to delicately lift the substantial glulam members and install them with precision.
