

## COMPANY SPOTLIGHT: Ohio DOT Rest Areas

Initiated by Ohio Governor Mike DeWine, along with the Ohio Department of Transportation and the Ohio Department of Development, the state of Ohio is upgrading 45 rest areas, which will include 33 new buildings. These rest areas prominently feature glulam in their design, offering a natural aesthetic that complements the surrounding landscapes and creates a welcoming environment for travelers.

Structural Wood Systems, Glue-Lam Erectors, Inc., and Heavy Timber Specialists, LLC, have worked tirelessly over the past few years to ensure that each project runs smoothly. SWS is excited to have already provided materials for 11 new rest areas, totaling 22 buildings.

Additionally, we have two other rest area projects in production and look forward to the opportunity to supply our custom Southern Yellow Pine glulam to future rest areas in Ohio.
