

## COMPANY SPOTLIGHT: CIHA: Tsali Care Center

Structural Wood Systems Sales Representative, Frank Sledge, worked closely with the Robins & Morton Group to supply the glue-laminated members and decking for the new state-of-the-art senior living facility in Cherokee, NC. This new facility boasts 120 resident rooms, along with other on-site amenities and access to medical care.

The facility features glulam trusses (pictured top left during construction) overlooking serene gardens and courtyards. The mono-slope entry roofs (pictured top right) provide a shaded welcoming entrance. Throughout the building, glulam beams and decking enhance common areas and therapy rooms (pictured side right), contributing to a warm and inviting atmosphere.

The Tsali Care Center exemplifies the benefits of using glulam in healthcare settings, offering a sustainable and therapeutic environment for residents. Thank you to Sales Representative Frank Sledge, and the team at The Robins & Morton Group for all your hard work.
